VITAE

Dr. David J. Scott had an early interest in Electronics and Natural Healing. He enlisted in the signal corp during World War II as a Radar Officer Trainee. He attended Illinois Tech and other schools of intense military technical training. Changes in military demands resulted in his being offered Flight Officer Training, but accepted instead Cryptographic Training from which he was assigned to General MacArthur's GHQ, South Pacific, for the remainder of the war. He was responsible for Automated Cryptographic Communications throughout the theater, with the pentagon and at times with the Commander in Chief. He moved northward with the war through the jungles of the South Pacific into the southern entry of the Phillipine Islands; Manilla, Okinawa, Korea, and Tokyo, Japan. Among his wartime trips, he flew over Nagasaki after the bombing and was awed, first hand, at the sight of the ultimate capability of humans for destruction of one another.

This exposure to human waste and suffering convinced Dr. Scott, who is both a Christian and a Naturalist by conscience to move into the field of Natural Healing.

He graduated cum laude from the National College of Chiropractic where he was a member of the Honor Society. He was certified in the basic sciences in Minnesota, Iowa and Florida by examination at these same universities. He passed the medical board of Ohio at a time when medical prejudice excluded 90% of the Chiropractic examinees. He was licensed by the Medical Board to practice in both Chiropractic and Mechanotherapy in 1950.

His practice was established and developed from 1950. He began practice as a Diversified Chiropractor in general practice, which he still continues today with a specialty in fasting.

In the early years of his practice he taught Physiology at the Great Lakes College where he helped students secure the credentials necessary to pass the Medical Board of Ohio. A number of those same students are still in practice today.

Dr. Scott has a keen interest in the scientific demonstration of physiological parameters, which clearly demonstrate the inherent and progressive healing activities found within the organism and which describe his trade mark slogan of "Health by Design." He monitors physiology carefully throughout the healing period and on into recovery.

Because he was seriously liver damaged by prescribed drugs during his military years, and because of many years of related chronic diseases, he developed a strong persuasion in the inherent healing capacity of the living organism as he gradually recovered by Chiropractic and Natural Hygiene. With this gratitude he has devoted his life to helping humanity to an understanding of avoidance of self destructive lifestyles and adoption of a way of life which includes self help.

To this end Dr. Scott has lectured extensively throughout the United States and Canada for the American Natural Hygiene Society where he has served on the Board of Directors for a number of years. He was instrumental in formulating policies which have brought this organization of grass roots laymen's educational activity to the forefront as a recognized and dominant health influence.

Dr. Scott was the founding President of The International Association of Professional Natural Hygienists, which is an International Association of Multidisciplinary Primary Care Physicians specializing in supervised Fasting. He remained at the helm of this Society during its formative years and until it was fully operational as a body of professionals with Internship Training Requirements, Codes of Ethics, Standards of Practice, along with structured soundness to carry it into the next century as a viable professional society. It is a growing body of doctors who both live by and raise their families by the teachings of Natural Hygiene. These same professionals including Doctors of Medicine, Osteopathy, Naturopathy, and Chiropractic meet annually for the sharing of research and knowledge about Natural Hygiene.

Dr. Scott is a Doctor's doctor who is frequently consulted with by fellow practitioners and often provides doctors and their family members with professional care.

His scientific credentials have earned him the reputation to be chosen to do research in Alkaline Phosphatase (AP). AP is an enzyme which is secreted by almost every cell of the body but which has slightly differing molecular characteristics depending on the tissue of origin. These same molecular characteristics still slightly change further in disease. He believes along with leading world scientists that refinement of this procedure may well lead to early tumor (cancer) detection even before tumors can be found. Participating in this study will be a number of his scientist friends, along with the expected cooperation of the National Institutes of Health.

Dr. Scott has been invited on many occasions to teach fasting and Natural Hygiene along with Laboratory Diagnosis at both his alma mater and other schools of Chiropractic where he enjoys guest lecture privileges. He presently is invited to participate as adjunct faculty in chiropractic training.

Dr. Scott has been screened by and nominated for listing with "Who's Who".

Dr. Scott has been in practice for 44 years and has personally supervised the care of over 40,000 patients. He has fasted, under direct supervision some 20,000 patients many of whom are of international origin. He has advanced into the space age of science with the latest technologies of demonstrating the status of human health by physiological parameters.

Better than all of this is that in his own lifetime, Dr. Scott has come to see his ideas about natural health move from complete disdain by the scientific community to complete acceptance and agreement. This could only be made possible by demonstrable exact science as implied by his life's motto - "Profound Simplicity".
